Guest Management Solutions

HostAlert+ Guest Management Systems

The HostAlert+ system simplifies table, wait list and reservations management, delivering a versatile, easy-to-use and cost-effective solution for both chain and independent restaurants alike. Integrated wireless handheld terminals and guest paging complete the solution, providing a fully-functional, flexible and affordable table management offering for every restaurant opportunity. An Advanced Reservations Module is available which allows you to manage your 'time slot' inventory, and keep an individual guest's history of visits, no-shows and cancellations.
