**JTECH wireless systems for restaurants enhance efficiency, improve customer service and guest satisfaction resulting in increased repeat visits and greater overall profitability.**

**ServAlert®**

ServAlert, the original silent server paging system, is designed specifically for restaurant applications to allow chefs to instantly notify servers when orders are ready, optimizing food quality, guest service and staff efficiency. The robust ServAlert transmitters are available in three panel sizes with standard features, accessories and options to accommodate all sizes and styles of restaurants. The new ServerPass™ pager provides a durable, low profile silent vibration pager designed for the rigors of the restaurant environment.

**Key features include:**

- 8, 16, and 32-button panels
- Multiple messaging capabilities
- Server Cancel and Expeditor modes
- Easy to use transmitters with removable nameplates
- Durable metal housing stands up to the demands of busy kitchen operations
- UHF technology provides complete coverage with range of up to a mile
- Supports the NEW ServerPass rechargeable vibration pager and the InstaCall™ Numeric manager pager
- Integrates with JTECH GuestAlert systems

**GuestAlert®**

The GuestAlert system efficiently manages customer flow and waiting guests in full service casual dining environments, while also simplifying the guest queuing challenges that plague the unique fast-casual dining niche. The Restaurant Tough® JTECH guest pager family enhances the overall guest experience by enabling more efficient service to waiting guests. Optional voice “table ready” alerts further enhance pager utility.

**Key features include:**

- Scalable with adjustable power settings with up to 2 watts fits all size operations
- UHF technology provides complete coverage with range of up to a mile
- Easy operation and installation
- Out-of-range feature captures guests and reduces pager loss
- Supports the popular Glowster® and the unique GuestPass™ and PatronPass™ rechargeable pagers
- Integrates with JTECH ServAlert systems

**ValetAlert™**

ValetAlert provides your guests with the ultimate in convenience and guest service. While paying the check, guests can remotely signal for their cars, allowing valet staff to deliver vehicles to meet departing guests, reducing guest queues and inconvenience. JTECH handheld transmitters fit in the palm of your hand, and communicate detailed text messages to the valet staff.

**Key features include:**

- UHF technology provides complete coverage with range of up to a mile
- Easy operation and installation
- Detailed text messaging
