

Two-Way Radio Solutions

Consistent with JTECH's long-standing reputation and leadership role in delivering on-premise communication solutions, we provide end-users with Motorola® professional two-way business radios and accessories to allow flexibility in applications requiring voice communications. Our suite of solutions include: CLS Series, XTN Series and AX Series radios.

CLS Series

The CLS Series is Motorola's smallest, lightest and least expensive professional radio offering designed for use in restaurants, retail stores and schools, as well as light industrial uses. CLS Radios are designed to work well in buildings up to 15 floors or 200,000 sq. ft.

STANDARD FEATURES

- ◆ One Watt of Output Power
- ◆ Up to Four Channels of Operation
- ◆ 56 UHF Business Exclusive Frequencies
- ◆ 121 Interference Elimination Codes
- ◆ Multi-function LCD Backlit Display
- ◆ Battery Meter Icon
- ◆ Audio Jack (hands-free) VOX (CLS 1410)
- ◆ Audible Call Alerts
- ◆ Multi-channel Scan (CLS 1410)
- ◆ Lithium Ion Battery (lasts up to 12 hours)

XTN Series

The XTN Series professional two-way radios add innovative features such as extended battery life, 66 frequencies and a digital display to enhance use. The XTN radios offer clear, dependable communications in buildings up to 20 floors or 250,000 sq. ft. The XTN Series delivers excellent mid-level commercial radio solutions for the quality conscious buyer requiring extended functionality and exceptional durability.
