

# ServAlert

Paging Solutions

## Reduce Stress Between the Kitchen and WaitStaff

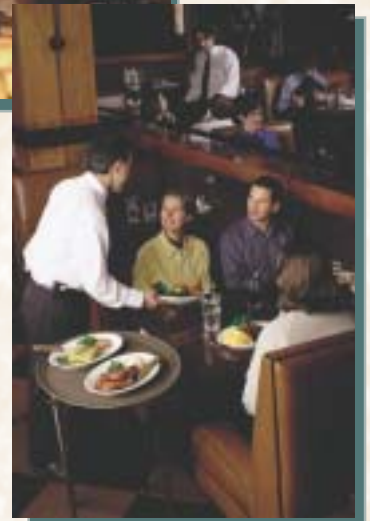

No matter what the delivery system - server pickup, teams or runners - the ServAlert® Paging System lets you run a smoother operation while increasing check averages.

Your servers will now have the time to focus on your guests and employ suggestive selling to increase sales. Plus, managers and servers can be notified if there are any questions or problems in the kitchen that will require immediate attention.

## ServAlert Benefits

- ◆ *Get food out of the kitchen faster*
- ◆ *Eliminate reheats*
- ◆ *Increase check averages*
- ◆ *Make food runners more efficient*
- ◆ *Reduce labor expenses*
- ◆ *Retain good servers with increased tips*
- ◆ *Benefit from more customer/server interaction*
- ◆ *Build better customer rapport*
- ◆ *Run a smoother operation*

*Let JTECH Be Your Trusted Solutions Partner...  
Today And For Years To Come.*

## ServAlert<sup>®</sup> Paging Systems

JTECH's single touch call panels are simple to use and make paging servers quick and easy. A simple touch of a button by the chef or expeditor sends a page to servers letting them know they have an order ready to be picked up. Rechargeable pagers allow for effortless operation and management.
