

Video Management Systems Integrated Solutions

Integrated with Micros 3700

Odyssey Technologies, Inc. offers a full line of digital video recorders capable of interfacing with the most advanced Point of Sale systems available in the industry.

Along with the Remote Eyes DVR and integration software, Odyssey provides the entire video system, including cameras, cabling, power supply, monitor and UPS. All system components are included in the standard one-year warranty, with a 3-yr extended warranty available on the DVR.

The following table lists the equipment necessary for complete 4, 8, 12 and 16 camera systems. These packages are available for professional installation by authorized security and POS dealers. The turn-key installation, including labor, represents the average installed cost of the system. Labor charges and final pricing are determined by the local dealer.

System Components	System Size - # of cameras			
	4-cam	8-cam	12-cam	16-cam
Description				
Remote Eyes Miniserver DVR, 30 day recorder	1	1	1	1

(Pricing does not include local sales tax.)

See additional information on reverse concerning system components and other factors that may affect the total price of the installed system.

Notes:

- (1) Micros PMS license required to run Remote Eyes SIM, and is available from Micros dealer, and is not included in above package pricing. RE SIM is included above.
- (2) All cameras listed are 1/3" format Sony Super-HAD cameras. Color/B&W cameras see in black & white in low light.
- (3) A 17" LCD monitor is used for 4 and 8 channel systems. 12 & 16 channel systems use a 19" monitor.
- (4) Installing dealer may add as much as 10% to entire system price in markets where high labor rates apply. Travel costs may also apply where there is no local authorized Remote Eyes dealer.
