

# Remote Eyes

## Video Management Systems Integrated Solutions

### Integrated with Micros e7

Odyssey Technologies, Inc. offers a full line of digital video recorders capable of interfacing with the most advanced Point of Sale systems available in the industry.

Along with the Remote Eyes DVR and integration software, Odyssey provides the entire video system, including cameras, cabling, power supply, monitor and UPS. All system components are included in the standard one-year warranty, with a 3-yr extended warranty available on the DVR.

The following table lists the equipment necessary for complete 4, 8, 12 and 16 camera systems. These packages are available for professional installation by authorized security and POS dealers. The turn-key installation, including labor, represents the average installed cost of the system. Labor charges and final pricing are determined by the local dealer.

| System Components                                       | System Size - # of cameras |         |          |          |
|---|----------------------------|---------|----------|----------|
|   | Description 4-cam          | 8-cam   | 12-cam   | 16-cam   |
| Remote Eyes Miniserver DVR, 30 day recorder             | 1                          | 1       | 1        | 1        |
| Remote Eyes Integration Software                        | 1                          | 1       | 1        | 1        |
| Per Terminal Integration License - Examples (1)         | 1                          | 2       | 3        | 4        |
| Color IR bullet camera, wall or ceiling, indoors or out | 1                          | 2       | 4        | 4        |
| Color/B&W dome camera, ceiling mount (2)                | 2                          | 3       | 3        | 4        |
| Color IR dome camera, wall or ceiling                   | 1                          | 2       | 4        | 6        |
| Color/B&W armor dome, wall or ceil. mount, outdoor      |                            | 1       | 1        | 2        |
| 66' Power/video pre-made cable w/connectors             | 3                          | 6       | 9        | 12       |
| 150' Power/video pre-made cable w/connectors            | 1                          | 2       | 3        | 4        |
| 12VDC distributed power supply                          | 4                          | 1       | 1        | 1        |
| LCD flat panel monitor (3)                              | 1                          | 1       | 1        | 1        |
| UPS - Battery backup, ES 550                            | 1                          | 1       | 1        | 1        |
| Materials and Labor - Complete Installation (4)         | \$6,102                    | \$8,268 | \$11,214 | \$13,457 |

(Pricing does not include local sales tax.)

See additional information on reverse concerning system components and other factors that may affect the total price of the installed system.

Notes:

- (1) The first two e7 terminal licenses are free. Fee for each additional integrated terminal included in examples above.
- (2) All cameras listed are 1/3" format Sony Super-HAD cameras. Color/B&W cameras see in black & white in low light.
- (3) A 17" LCD monitor is used for 4 and 8 channel systems. 12 & 16 channel systems use a 19" monitor.
- (4) Installing dealer may add as much as 10% to entire system price in markets where high labor rates apply. Travel costs may also apply where there is no local authorized Remote Eyes dealer.

**Camera Descriptions and Typical Use**
